ABOUT ME

I'm 28 years old Brazilian Web Developer & Freelance currently based in Lisbon. I love everything that has to do with programming and new technologies. Despite my Java background, since 2018 I started to work with ReactJS because I decided to consolidate my career as a frontend developer.

WORK EXPERIENCE

SINCE JUN 2019

Full Stack Developer
PDMFC, Lisbon - PT

- Started to implement and maintain Scrum in the team (dealing with Scrum team to show the benefits of the Scrum in the project.)
- Main responsible by the invoice feature (integrating with Moloni) and by the flow that generates card's certificates (PKI);
- Customer Service (production environment) to help and identify bugs and improvements between the incremental process;

Technologies: ReactJS, Java (Eclipselink), SQLServer, PKI, Git, Docker, Scrum.

MAY 2018 - FEB 2019

Senior Software Developer
Mobix Software Studio, Pernambuco - BR

I was allocated (outsourcing) in a confidential project to build a platform for entrepreneurs and startups help and share information to each other (a social media like).

- **Technologies:** Microservices, Java (Spring), MongoDB, Elasticsearch, Git, Docker, Python, Flask, Kafka, Jenkins, Redis.

JUL 2016 - MAY 2018

Security Analyst
Tempest Security Intelligence, Pernambuco - BR

- Automation of vulnerability tests;
- Infrastructure Security Consulting;

Technologies: Java, Ruby scripts, Shell Scripts, JIRA, Git

OCT 2014 - JUN 2016

Jr Backend Developer | Remote
E.Life, São Paulo - BR

- Developed solutions Java Web (Hibernate) responsible to retrieve information from social media and feed the company product;

- Developed features to centralize all social networks in an application (ETL). Thus, the user can manage your accounts and spread your posts, actions and do a better customer support for their clients;

Technologies: Java (Hibernate); Ruby scripts, Twitter API, Facebook API, SQL database
